Marko Horvat is a Vice-Dean for Science, International Cooperation and New Study Programmes at the Zagreb University of Applied Sciences, Zagreb, Croatia. He is a tenured Senior Lecturer in computer science at the Department of Computer Science and Information Technology, Zagreb University of Applied Sciences, Zagreb, Croatia. He is an external Associate Professor at the University of Zadar, Zadar, Croatia (2018 –).

He holds the Diploma (1999), MSc (2007) and Ph.D. (2013) degrees in computer science from University of Zagreb, Faculty of Electrical Engineering and Computing, Zagreb, Croatia. He is a Member of the Scientific Council of the Croatian Mine Action Center - Testing Center for Development and Training d.o.o. (2017 –), the Chair of Technology Management chapter (TEMS) in IEEE Croatia Section (2016 –), and Editorial Board Member of the international scientific journal "Polytechnic and Design" (2016 –). He was a researcher on a scientific project "Adaptive Control of Scenarios in VR Therapy of PTSD" supported by the Ministry of Science, Education and Sports, Republic of Croatia (2007 – 2009). A researcher in EU e-research framework COST actions IC1302 "Keystone" and IC1307 "iV&L Net" (2013 – 2017). A researcher on a science project "MULTISAB: A software system for parallel analysis of multiple heterogeneous time series with application in biomedicine" with the Croatian science foundation (2015 – 2018). He was an expert on a project "Politehnika 2025" with the Ministry of science, education and sports of the Republic of Croatia (2015 – 2016).

He has published more than 70 textbooks and manuscripts in books, journals, conferences, and workshops. He was Reviewer for many respected journals and international conferences, as well as foreign project proposals and study programs. He gave several invited lectures and is actively engaged in the popularization of science. Current IEEE Senior Member (2007 –) and Croatian Astronomical Society (1990 –). His research interests include machine learning, automated reasoning, information retrieval, affective computing, and the semantic web.
